

five_mobile_restricted Turtlebot 3 Report

Matthew Swartwout

July 12, 2016

This is a summary of the data from the five_mobile_restricted experiment, Turtlebot #3.

The runtime of this experiment was 0 hours, 0 minutes, and 59 seconds.

The total number of external pose measurements recieved by the robot during this time was 823 which means poses were received at an average of 13.9491525 poses per second.

Shown below is the summary of each filter's error for both x and y coordinates, and also the error in total distance.
