two_stationary Turtlebot 1 Report

Matthew Swartwout

August 15, 2016

This is a summary of the data from the two_stationary experiment, Turtlebot #1.

The runtime of this experiment was 0 hours, 0 minutes, and 50.7 seconds.

The total number of external pose measurements recieved by the robot during this time was 0 which means poses were received at an average of 0 poses per second.

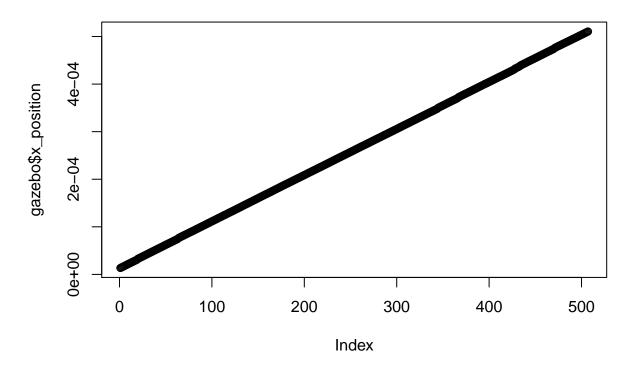

Shown below is the summary of each filter's error for both x and y coordinates, and also the error in total distance.

```
