two_mobile_noiseless_no_gps Turtlebot 1 Report

Matthew Swartwout

August 15, 2016

This is a summary of the data from the two_mobile_noiseless_no_gps experiment, Turtlebot #1.

The runtime of this experiment was 0 hours, 1 minutes, and 38.9 seconds.

The total number of external pose measurements recieved by the robot during this time was 173 which means poses were received at an average of 1.7492417 poses per second.

Shown below is the summary of each filter's error for both x and y coordinates, and also the error in total distance.

```
