# five\_mobile Turtlebot 4 Report

# Matthew Swartwout July 12, 2016

This is a summary of the data from the five\_mobile experiment, Turtlebot #4.

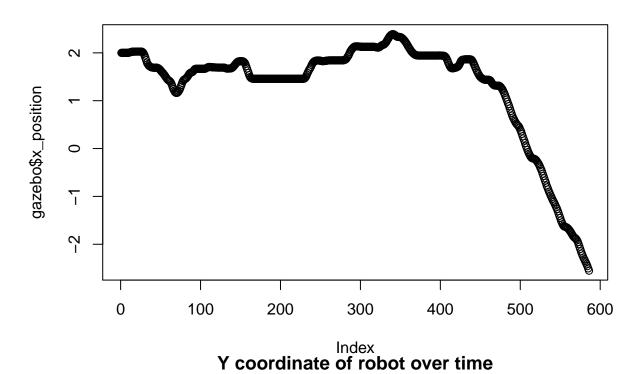

The runtime of this experiment was 0 hours, 0 minutes, and 58.6 seconds.

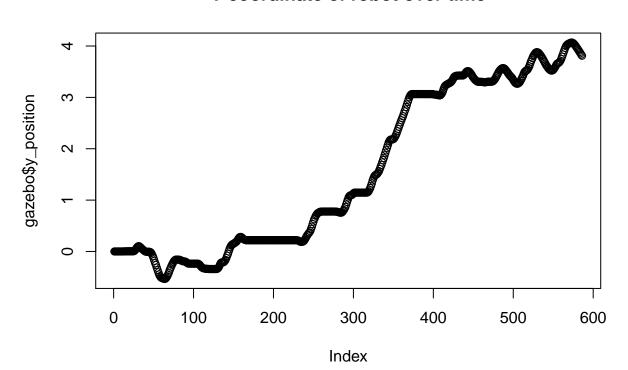

The total number of external pose measurements recieved by the robot during this time was 547 which means poses were received at an average of 9.334471 poses per second.

Shown below is the summary of each filter's error for both x and y coordinates, and also the error in total distance.

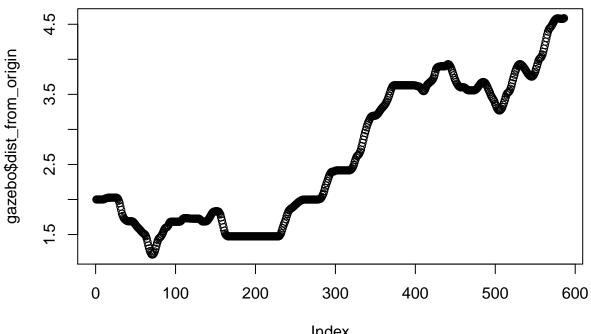

```
