two_mobile_restricted Turtlebot 2 Report

Matthew Swartwout

June 30, 2016

This is a summary of the data from the two_mobile_restricted experiment, Turtlebot #2.

The runtime of this experiment was 0 hours, 1 minutes, and 58.6 seconds.

The total number of external pose measurements recieved by the robot during this time was 67 which means poses were received at an average of 0.5649241 poses per second.

Shown below is the summary of each filter's error for both x and y coordinates, and also the error in total distance.

```
summary(continuous$x_error)
```

```
##     Min.  1st Qu.   Median     Mean  3rd Qu.     Max.
